

iMUNC 2018

Futuristic Crisis

International Anarchy and Terrorism Response Committee

Chairs

Lucas Kulin (lucask18@nycischool.org)

Charlotte Seifert (charlottes26@nycischool.org)

Hello Everyone! Welcome to iMUNC. In this committee, delegates will have to discuss the influences and damages of an extremist group known as the New World Order, which has used its global power and influence to topple states and bring a reign of chaos upon the world, all while staying in character with their delegation. Delegates will represent still standing nations and organizations attempting to alleviate the torn asunder world and bring relative peace to our small, blue, marble. We are looking forward to hearing all your innovative ideas. If you have any questions, feel free to contact us.

Best wishes,

Lucas R. Kulin

The world has fallen into chaos. Under the influence of an extremist group known as the New World Order (NWO), states have fallen and chaos has rained.

Current date: 6/26/ 0 AC (after collapse)

General information:

In the year 2024 the war on terror was nearly finished with victory insured for Middle Eastern countries that had been fighting with support from many western countries (Canada, America, and several EU countries). During the war, several new radical groups rose from previous ones or splintered off on their own. Many were quickly extinguished and abolished, but others became more powerful than their previous organisations. The main threat that has emerged from this is the NWO (New World Order), a radical organisation that wants to unite the entire world under one central government. While movements like this have happened before and have never gained too much support, this organisation has been gaining supporters all across the globe and the support of some nations.

During the war on terror there were many civilians who believed that their suffering was created by lack of global cooperation. Because of this many people decided that the only thing they could do was band together and protect themselves from the outside. Soon as their group grew from a few individuals to a few hundred, they moved to Anarak, in the Persian empire.

In 2024, Iran underwent a democratic revolution. This revolution was named the war of sand and ash as the rebels burned the capital Tehran to the ground after a long siege on the Iranian capital. Although this new nation was condemned for not following human rights or the Geneva conventions, there was little that other nations could do besides sanction the new nation. Due to these sanctions, the person elected to be their first leader was an isolationist, a man named Zand Gal. Gal appeared to be a simple isolationist but was more than that. He quickly got rid of elections and became a dictator. He underwent a large mobilization, effort claiming to want to wipe out all terrorism in the Middle East forever. When he was asked to support Middle Eastern nations to the west of him (Afghanistan and Pakistan), he responded by sending in his army and occupying the nations under the pretence of helping them. He then dubbed his nation the Persian empire. Gal was then subject to embargoes and sanctions from nearly every nation on the planet. He then provided to take Syria and Iraq before the UN threatened not to give them a place on the council. The Persian empire became a dominant, though unstable world power in the year 2031.

While this was happening, the USA was in another civil war. After tensions broke out as it was discovered that the 2020 election was rigged in favor of Donald Trump, in 2021 many states decided that they wanted out of their current nation. The states that wanted out were California, Washington, Alaska, and all of New England. These states were the economic centers of the United States, so it was unable to afford a new army to fight against these rebels. Instead, a militia of untrained gun owning Americans was formed. Although the North had enough money to fight, it did not have a population eager to go to war. The result was an army of 20,000 people. Because neither side was able to muster a strong enough force to conquer the other, the two nations sat down and fortified their positions, creating a long line of defences along their borders.

This line of fortifications became known as “The Line”. Both sides realized that there would not be any victor if the current strategy was used. Both sides called out to their allies, but none were able to join in the war. As a result, America formed an unlikely alliance with Russia to destroy the North. In response to this, the North signed a treaty officially making it a part Canada, prompting Russia to leave its alliance with the USA as it did not want a war with Canada and the rest of NATO. With no support, America knew it had to let these states go. A peace treaty was signed in 2026.

After the civil war, America was kicked out of NATO for creating an alliance with the Russian Federation. This, the loss of its economic centers, its debts, and its reliance on China led to the USA quickly losing all of its money. The central government of America became a totalitarian regime headed by Donald Trump. As America was running out of supplies, Trump created a program to feed people just enough. American society crumbled and devolved into a nation similar to that of 2017 North Korea. As America degenerated, its neighbor Canada was flourishing. It had acquired the rebel territories and quite a few nuclear weapons. Canada's economy significantly increased in value, establishing Canada as a world superpower.

After the USA was kicked out of NATO, it denounced the UN, Europe and their allies, saying they had become “blinded by greed and evil”. That night, a stealth bomber destroyed the UN building in NYC. The US denies they had anything to do with its destruction. The attack on the UN building was dubbed the “attack on peace” and prompted the UN relocation of 2027 to Antarctica. The US lost its veto power in the UN after the attack, and it was replaced by Canada.

After the American civil war, a man by the name of Bokamoso in Lesotho saw a small group of states overthrow a world superpower. Bokamoso, who lived in South Africa, moved to Lesotho in 2027. He then proceeded to supply arms to a small militia in Bokong. In 2030, Bokamoso and his militia staged a coup d'etat and took over the Lesotho government. Through a second strike, south Africa's government was dissolved. With a military regime in control of Lesotho, South Africa was quickly brought under the regime's power under the pretense of

restoring the South African Government, however the now “League of Lesotho” has never shown any intention of restoring the government. After the League took over South Africa, they immediately started “operation beans”, an endeavor to destabilize all governments of Africa below the equator. They would perform coups everywhere below the equator in Africa to install governments that would join the league of Lesotho and start a federation. The operation was a success and the league has had aspirations of uniting all of Africa and Europe under one flag.

In 2034, the nation of Luxembourg found the acts of Lesotho inspiring, so much so, in fact, that a militia was formed in their nation and attack Belgium with the hopes of conquest, NATO responded and wiped out the militia. After this incident the government tried to distance themselves from the attack. It was in 2035 when the NWO infiltrated the Luxembourg government and became influential with nearly all of the political community, and through massive propaganda campaigns they convinced the public that it would be best to leave NATO and join the League of Lesotho. A referendum was held and the people of Luxembourg decided it was best to leave NATO and join the League in 2036. This was the first large move on the part of the NWO, it was when their global influence was finally uncovered. After the “election of unification” was placed the NWO started to make their presence known.

The NWO looked to the league of Lesotho as an opportunity to find a place where their ideology might be embraced, a massive NWO rally was held in what used to be Angolia. After this rally a meeting was held between the dictator of the League and some NWO officials, the contents of the meeting are unknown but the League says it was a warning to cease activity in their territory. Even though it may have been said that the NWO left the League there is no way to know for certain. In the next week however the NWO gave the UN a request, the request was to help them find some land to set up their own government and society. The UN refused as they had many crisis already to deal with due to the League and the Persian Empire. After the UN’s refusal the NWO purchased a Nuclear bomb from an unknown nation and blew up the new UN headquarters.

After the bomb went off an emergency UN meeting was held in Canada beneath the Pentagon. All nuclear nations decided to 9/10 all WMD's and to destroy them in accordance to the nuclear freeze act of 2037. The NWO was immediately regarded as a terrorist organisation bent on destroying the world. As a result the NWO went silent and was supposedly scared out of existence in 2042.

Although this may be true there have been incidents with some NWO throughout the years. In 2043 there was an NWO agent caught stealing weapons from the USA, in 2044 there was a large quantity of money "lost" by the League of Lesotho and supposedly given to the NWO, and in 2046 the Taiwanese president was killed and left with a note that said "for a New World Order". These incidents proved that the NWO might still be around but has hidden themselves, as a result Russia, France and the UK committed massive purges to try and root out NWO agents, killing millions in what was called the endless river. This purge started an act of cooperation between all of the nations involved as they signed the a deal that would insure that each of them contributes large quantities of resources to deal with the NWO and remove them from any affected country. These countries branded themselves as the union of freedom and imposed massive sanctions on any country that had connections with the NWO, including the USA and the League.

The Union of freedom has been reported to have created a special agency known as the Union of Freedom Officers or UFO. This agency has supposedly taken out many cells of the NWO, this has come at a cost, hundreds of civilians have been killed by suspected agents across the world. The Union has supposedly deployed agents to nearly all countries across the globe, this has made many nations feel threatened by the Union; China, Germany, and Australia denounced the actions of The UFO and the Union itself. This made has made a serious impact on the credibility of the union and the opinions of their allies.

All remained silent for the next few years, with the exception of small political disagreements. However on December 29th, the NWO lead a very large attack on the

international community. The NWO destroyed the government's across the world, creating anarchy in every region of the planet. South and central America has fallen with the exception of Bolivia and Mexico. In Asia, only the major powers remain. In many parts of the world governments have not been destroyed but crippled and unable to sustain itself indefinitely. The NWO accomplished these tasks through assassinations, coups, and bribery of politicians. The NWO released a statement saying that what they had done was necessary to unite the world. Thousands have died and millions are dying now.

Many as a result of the anarchy brought to the the world several of the surviving nations have agreed to meet at the UN in a security council to discuss ways to protect themselves from the NWO. Veto power from the permanent members has been taken away due to the possibility of NWO collusion.

Within the last few days small militant groups have taken over small pockets of land. These groups have had no controlling factors and have the ability to further expand into another nation's territory. It has not been discovered if these militias have sympathies or loyalties to the NWO.

Issue being addressed:

1. Neutralize or negotiate with the NWO to prevent further damage to civilization and the human race.
2. Find ways to help those in unstable areas
3. Bring stability and protection to existing nations.

It is this committee's goal to bring about order and peace to the world. This committee should acknowledge the need for safety in unstable areas and within remaining nations. The primary goal of this committee should be finding possible methods and actions to take to neutralize or negotiate with the NWO.

Questions to consider:

How can we confront the threat of the NWO?

How can we bring stability to areas affected by NWO anarchy and areas that are under the control of militant groups?

How can we prevent further damage to the remaining governments of the world?

Positions and Nations (please read all of them as they all have specific information that may have not been included in the general information)

USA: The united states has suffered great economic and infrastructural damage after its civil war. After its war it shifted its political system into a despotism that has began to show signs of shifting into a monarchy. This nation has held a resentment for the nation of Canada. After the civil war America was accused of bombing the UN but no evidence has been given to prove so. America has been known to be brutal to its people and have been reported to possibly be connected to NWO agents.

Canada: Canada has held a bitter resentment of the USA after some of its previous states joined its union in the second American Civil war. Canada's economy has been growing with exponential speed after they acquired the seceded states. Canada is strong in growth and this is one of the reasons it has remained fully stable.

Persian Empire: Persia has been a powerful nation in the middle east ever since it acquired new territories through its conquests. The middle east has only been held together by Persia's strength, and one of the reasons it has been mostly unaffected by the NWO. However Persia has never denounced the NWO and is believed to have some sort of connection or contact within the NWO that has insured their safety. Persia's expansion threatens the nations surrounding it and has been labeled as the major aggressor in the world, right next to the League of the Lesotho.

Saudi Arabia: Saudi Arabia, like most middle eastern nations have denounced the actions of Persia as they are under threat from the expansions of Persia. Saudi Arabia has been hit hard by the NWO attacks and Persian advances have hurt them much more than anything else.

Russia: Russia has been brutal of its NWO purges, millions have died in its attempt to solidify its role in the Union of Freedom. Russia puts pride on its Union status and has not compromised on its policies. Russia backed the USA in the Civil war and as a result they hold a special connection with the USA despite the rest of the Union's position of supporting Canada in North America.

UK: the UK drifted away from Europe after its Brexit and it had sealed itself off from all immigration. Its isolation policy ended with its transition into the Union but it is still having trouble re entering the global economy, as a result its economy is weak and only held together through Union support. The UK have had purges but they have been weaker than those of other Union nations as a result of their minimal control and small economy. The UK has been publicly denounced as a puppet of the other Union nations however Union officials deny this.

Germany: A mostly economic nation, Germany was hurt very badly by the NWO attacks so its small military has been used to protect important regions of its land such as cities, as a result of the small army, many areas of Germany have been falling into the hands of militant groups. Germany has a strong economy but their borders have been shrinking and they have been losing control of their land. Germany has been offered a position in the Union of Freedom but they have turned this down as they have publicly denounced the actions of the Union against their own citizens.

China: China was hit hard by NWO attacks and as a result they have large areas of land under the control of militant groups, similar to the situation of Germany. Unlike Germany however millions have been killed by these rebel groups as they have gone unchecked without

neighboring union nations to prevent them from spreading. These groups have become very violent and have made China quickly spiral downward with loss of power all over its territory and millions of its citizens killed. The Chinese military has been able to protect large areas of land but their strength has been dwindling. Ever since the attacks the Chinese have been openly considering a membership with the NWO as their situation continues to grow darker.

League of Lesotho: the League has been known to conquer through dividing and destabilizing, in a similar pattern to the NWO. The League has been known to have many of its citizens in support of the NWO. The League has been continuing to expand its territory into Africa after the collapse of several of the African governments. It is predicted that at the current rate of expansion Africa will be completely controlled by the league within 1 year. This expansion through Africa has supposedly ended in thousands of people being killed as they resisted takeover, the league has claimed it has only killed those supporting the militant groups in control but Union nations have been seen to disagree with this statement. The league does not only control regions of Africa but also the territory of Luxemburg, this small territory will be key in these talks as the Union is forced to share a border with this supposed NWO supporting nation.

Australia: Australia is the most unstable government attending this conference. Only the major cities and coastal areas are left under government control as NWO attacks continue to shrink Australian territory. Militant groups have been highly active in its desert regions especially and have been slowly expanding into new territories. Australia has expressed a need for assistance but has refused all Union help.

Egypt: Egypt has been under threat from a variety of states; the NWO, League of Lesotho, and Persia have all placed claims on Egypt. Egypt's primary goal is to protect itself from foreign entities like Persia and the League as it sets in its military to protect its own lands from militant groups. Egypt is in a highly unstable area with many militant groups surrounding its territory, as a result the nation is highly defensive over its lands.

Mexico: Mexico is a nation that has not been affected by the NWO directly but suffers from invasions from American militant groups. America has refused to aid Mexico in its efforts to protect itself against these groups. Mexico has been shrinking along the US border as the US expands and claims the land for itself. Mexico has aligned itself with Canada in its anti USA efforts.

France: France has been very harsh on its citizens like the other Union nations but it has recently been subjected to large amounts of revolts and protests against the French government. These revolts and protests are not coming from the NWO but rather small regions of France that wish to proclaim independence. These regions have been placed under military rule from the government and have devastated the people's faith in the French government. The only thing holding France together is the military support of other union nations.

Bolivia: Bolivia is one of the few nations that has benefited from these attacks. Bolivia itself was not attacked by the NWO, however all of its neighboring nations were and have fallen into anarchy. Unlike nations like China or Mexico, Bolivia has been able to prevent militant groups from becoming a threat in the region. As a result of the relatively minimal amount of violence near Bolivia, the nation has been able to expand its borders throughout South America. Bolivia has denounced the nations in support of the NWO but has refused to acknowledge that they have directly benefited from the NWO stating that they have earned the lands by protecting the people of South America. Bolivia has openly announced that while it believes that NWO needs to be dealt with, nations should individually take care of the militant groups. Bolivia has been known to give military aid to nations that agree to support its values.

India: India holds a strong hatred for nearly every remaining nation. India has been badly hurt by the NWO attacks and millions of their citizens died to reclaim India's lands. India called for help during its war against the militant groups but many nations had already viewed India as a doomed nation that would not be worth the effort to save; the only nation that gave support to India was Bolivia and India has felt indebted to that nation ever since, providing constant support

to Bolivia in its South American expansion. India still hold a great resentment of Pakistan as tensions build on the border.

Pakistan: Pakistan has been rather neutral in this chaos but they have been reaching out to many different organisations and nations for support against the NWO and India, so far no nation has responded to Pakistani call for help but the Union and the League of Lesotho have been delegating separately on accepting Pakistan into their organisation.

Kuwait: A city state nation that has faced continued oppression from Persia as they have been under constant siege. Persian soldiers faced horrible conditions and as a result they have rebelled against Persia and formed a buffer zone between the two nations. Kuwait has depended on Bolivia for support in their fight to protect their city.

Turkey: Turkey has had to remove its government from Ankara and was forced to move its government into Istanbul, Militant groups are rampant in Anatolia but they have been limited by the rough terrain. Greece has been at war with Turkey every since the collapse as they both saw it as an opportunity to invade the other. Turkey has applied to be part of the Union but has not received response as the Union does not want to infringe of the past policy of keeping Turkey out of Europe created by the European Union.

Greece: Greece has suffered catastrophe as the majority of its island territories have fallen into anarchy through faulty local management. The Greek government has struggled to hold together its economy as it is still recovering from its economic catastrophe that has been progressing throughout the past 45 years. Greece has submitted a request to join the Union but the Union issued a statement that it will not get involved in the war between Turkey and Greece.

Korea: Korea's unification has made it a valuable asset to those in Asia as its naval abilities allow it to reach the destabilized islands of Japan. Recently however Korea has been split by NWO and Union forces. A Union invasion commenced after an attempted coup d'état on the

Korean government and Korea has had to seek aid from Bolivia in its endeavors of reunification. The other side opposite of the Korean capital has fallen into NWO and union hands, Korea has been attempting to take back its lands but has been pushed back, Bolivian support is key for Korea.

Uruguay: Uruguay has not been recognized as a nation by Bolivia and its allies. Although South America is in all in Anarchy expect for Bolivia, the Uruguayan government and military still exist and have made claims to their previously owned territory. They have received military aid in fighting off militant groups and Occupying Bolivian armies. The nation of Uruguay represents the weakness of the Bolivian Army.

Vanuatu: Vanuatu is a nation hurt by the NWO in such a way that they have been cut off in their trade with the outside world. Their economy has been devastated and their people have faced a food shortage. Vanuatu has been losing its ability to control its islands and as a result they have become susceptible to uprisings. They have called out to any organisation or nation that can assist them.

Spain: the Spanish government has denounced the actions of the NWO and the Union but has been forced to flee its main territory as militant groups pushed the Spanish armies out of the Iberian peninsula. The Spanish government now lies in its territories in Morocco where it has used the rest of its military to conquer Moroccan lands. Spain has been backed by the Union in its fight against Morocco.

Morocco: Morocco has struggled ever since the collapse as many of its lands were lost to militant groups. Morocco has now had to fight off Spain in a brutal war. Morocco has received Bolivian support in its war. Morocco has been a strong opposer of the League and the Union every since the founding of either.

Sweden: Sweden has been forced to let go of its more northern lands in an effort to hold onto its urban areas. Sweden's main effort is in preserving its people and has been liberal in its acceptance of refugees from other nations.
